How people live in New York is a subject of general interest, and it is fully treated of, from the lowest hovels to the palaces on Fifth Avenue. in a beautifully illustrated article in Demorest's Monthly Magazine for June. It takes you, by way of illustrations and descriptions, from the squalor of the 5-cent lodging-houses, through the various phases of life to the gorgeous modern flats and the palatial homes of the Astors and Vanderbilts. In this number is found also "Amusements in Japan," which, differing so radically from our amusements, are amusing to read about, especially as the article is so finely illustrated. "How to form a Club," by "Jenny June," is necessarily well written, and in a chatty way gives much good advice. There are numerous other interesting articles and amusing stories, and a full-pagewater-color of "Water-Lilies" is well worth framing. It is a beautiful number and will no doubt have an immense sale.

His first efforts were exceedingly creditable. He secured some paints and has produced some pictures that attention on account of their correctness, He has an eye either for landscape or portrait work. Last week he came into the Hustler office week he came into the Hustler office bringing with him his last effort. I was a drawing of a copy of The Hustler of April 11th, 1889, with several additional touches. The picture is one that attracts universal attention and favorable comment. It is one that can not be easily described but must be seen to be appreciated. The work was done with a lead pencil and certainly possesses great merit. It has been framed and will be kept as a sonvenir. This colored boy is a born artist and it is a great pity that he is not able to go to some school of art where he could perfect himself in the business. We believe that if he had the proper training that he would in time become an eminent value of the shows, Clerk.
